Career Objective

AI/ML Engineering graduate with a strong foundation in software engineering, machine learning, Generative AI and full-stack development. Experienced in developing scalable applications, intelligent AI solutions, and retrieval-based systems using Python, Java, React.js, SQL, and modern AI frameworks. Adept at problem-solving, writing clean and maintainable code, and collaborating in team environments. Seeking an entry-level Software Developer or Machine Learning Engineer role to contribute to innovative products while continuously enhancing technical expertise.

Education

Panimalar Engineering College, Chennai May 2026
B.Tech in Artificial Intelligence and Machine Learning CGPA: 8.15 / 10

Bhaktavatsalam Vidyashram CBSE School, Tamil Nadu 2022
Class XII (HSC)

Technical Skills

Programming Languages: Python | Java | SQL
AI/ML: Machine Learning | Deep Learning | Scikit-learn | NLP | RAG | Generative AI | Prompt Engineering | LLMs | Transformers
Libraries & Frameworks: Pandas | NumPy | Matplotlib | Streamlit | PyTorch | TensorFlow | LangChain
Databases: ChromaDB | MySQL | Mongo DB
Tools & Platforms: Git | GitHub | VS Code | PyCharm | Docker | REST APIs
Web Technologies: HTML | CSS | React.js

Projects

Interior Design Recommendation System — RAG, Gemini API, NLP, Computer Vision Dec-2025

- Built an AI-based interior design suggestion platform leveraging RAG to generate tailored style recommendations from room images.
- Devised a multimodal architecture using CLIP embeddings, lowering average semantic-search retrieval time by 35% compared to a baseline keyword-search implementation.
- Performed user validation with 50 participants, reaching a 70% satisfaction rate and strengthening recommendation quality through iterative feedback.

AI-Powered Diet Recommendation System — Python, Streamlit, Gemini API March-2025

- Formulated an intelligent nutrition planning system powered by Gemini, achieving 91% accuracy when evaluated across 47 manually reviewed diet cases.
- Built a responsive Streamlit frontend interface with real-time AI-based recommendations and optimized user interaction workflows.
- Incorporated a user feedback logging mechanism, contributing to a 25% increase in repeat usage during a two-week test period.

Legal AI Assistant — Python, ChromaDB, Gemini API Feb-2026

- Constructed an AI solution to interpret crime descriptions and align them with relevant IPC sections through retrieval-augmented reasoning.
- Refined the embedding workflow alongside a search strategy, lowering false-positive outcomes by 20% while increasing classification precision.
- Validated performance on a labeled set of 1,877+ records, delivering 79.2% accuracy, with Recall = 0.84 and MRR = 0.90, indicating effective ranking capability.

Certifications

- Generative Models for Developers – Infosys (Apr 2025)
- Introduction to OpenAI GPT Models – Infosys (Dec 2024)
- Data Science for Beginners – NASSCOM (Nov 2023)
