Career Objective

AI/ML Engineering student skilled in Python, Machine Learning, NLP, RAG pipelines, and Generative AI applications. Experienced in building AI-powered systems using Gemini API, ChromaDB, Streamlit, and Scikit-learn. Passionate about developing scalable AI solutions and full-stack applications with strong analytical and problem-solving abilities.

Education

Panimalar Engineering College, Chennai B.Tech in Artificial Intelligence and Machine Learning CGPA: 8 / 10	Graduation: 2026
Bhaktavatsalam Vidyashram CBSE School, Tamil Nadu Class XII (HSC)	2022

Technical Skills

Programming Languages: Python | Java | SQL | JavaScript
AI/ML: Machine Learning | Scikit-learn | NLP | RAG | Generative AI | Prompt Engineering
Libraries & Frameworks: Pandas | NumPy | Matplotlib | Streamlit
Databases: ChromaDB | MySQL | MongoDB
Tools: Git | GitHub | VS Code | PyCharm
Web Technologies: HTML | CSS

Projects

Interior Design Recommendation System — Gemini API, RAG, NLP, Computer Vision	2026
- Created an AI-based interior design suggestion platform leveraging RAG to generate tailored style recommendations from room images. - Devised a multimodal architecture using CLIP embeddings with ChromaDB, enhancing semantic search performance and lowering retrieval time by 35%. - Performed user validation with 50 participants, reaching a 70% satisfaction rate and strengthening recommendation quality through iterative feedback.	
Legal AI Assistant — Python, ChromaDB, Gemini API	2026
- Constructed an AI solution to interpret crime descriptions and align them with relevant IPC sections through retrieval-augmented reasoning. - Refined the embedding workflow alongside a search strategy, lowering false-positive outcomes by 20% while increasing classification precision. - Validated performance on 1,877+ records, delivering 79.2% accuracy, with Recall = 0.84 and MRR = 0.90, indicating effective ranking capability.	
AI-Powered Diet Recommendation System — Python, Streamlit, Gemini API	2025
- Formulated an intelligent nutrition planning system powered by Gemini, obtaining 91% accuracy across 47 evaluated diet cases. - Built a responsive Streamlit frontend interface with real-time AI-based recommendations and optimized user interaction workflows. - Incorporated monitoring mechanisms and feedback loops, boosting user retention by 25% and supporting ongoing refinement.	

Certifications

- Generative Models for Developers – Infosys (Apr 2025)
- Introduction to OpenAI GPT Models – Infosys (Dec 2024)
- Data Science for Beginners – NASSCOM (Nov 2023)
